1320 Club

Celebrate someone special with a 1320 Club plaque beautifully displayed here in the Wally Parks NHRA Motorsports Museum.

Available to individual and family names only, the 1320 Club features attractive 5" x 12" plaques mounted in an elite lineup that extends along 1320 feet of the Museum's inside wall space, a very visible testament to the incredible spirit that has long distinguished drag racing, hot rodding and our associates in motorsports.

All plaques are numbered, and will be limited to 1,320. Limited supply still available. Plaques are \$350 each. Duplicate plaques may be ordered for an additional \$158.77. And because the Museum is a non-profit 501(c)3 public charity, your gift may be tax deductible.

We've been asked many times over the past 50 years, "Why the quarter-mile?" The answer has always been, "That is the maximum distance we could safely run on the average airstrip runway in drag racing's earliest days, and still have room to get stopped." So 1,320 feet became the standard benchmark by which most of today's high-speed acceleration performances are measured - an established icon in motorized folklore.
